

**Quick-Boy**

## Technical Data

<b>Working radius</b>	5.41' (1.65 m) to access any position on the workpiece without difficult shifting or repositioning
<b>Carrier weight</b>	Max. 13.23 lbs (6 kg) to carry and to balance the stud welding gun weight
<b>Order No.</b>	<a href="#">92-40-142 for C 08/CA 08</a> <a href="#">92-40-140 for PAH-1</a>

## General Information

- Other working radius and carrier weight on request

## Advantages

### Features

- A rectangular seating of the stud welding gun reduces the scrap rate when welding with tip ignition
- Strength-saving working without getting tired
- Wide working range, large reach
- High process reliability
- Constantly good welding results

### Description

- Parallel displacement for vertical positioning of the stud welding gun
- Smooth-running guidance without jerks
- Freely movable arm
- Fixation of the welding cable
- Easy fastening to the welding table
- Integrated seat of the stud welding gun
- Light weight construction

### Suitable stud welding guns

- Manual stud welding guns C 08/CA 08
- Automatic stud welding gun PAH-1
